SUMMARY

Front-end developer with 5+ years of experience building web applications with **React.js**, **Next.js**, **Vue.js** and **Nuxt.js** for clients across the US and Europe. I take products from design to production: pixel-perfect, responsive interfaces, well-structured state and data flow, multi-language support, unit and end-to-end tests, and deploys to Vercel or Cloudflare. Comfortable working solo or as part of a team, with clear communication and on-time delivery. I use agentic workflows and spec-driven development with AI agents to ship faster while keeping the code clean and maintainable.

EXPERIENCE

Front-end Developer — KLIOX · Part-time — Apr 2026 – Present

- Build and maintain front-end features as part of KLIOX's development team.

Front-end Developer (Freelance) — Upwork · Top Rated · 100% Job Success — May 2022 – Present

- Delivered 70+ projects for clients in the US and Europe: SaaS products and dashboards, crypto exchanges, job boards, and marketing sites, from MVPs on a deadline to long-running platforms.
- Build SPA, SSR, and static front-ends with React.js / Next.js and Vue.js / Nuxt.js, typed with TypeScript.
- Turn Figma designs into pixel-perfect, responsive interfaces; set up state management, localization, testing, and deployment.
- Work directly with founders and product teams: clear estimates, regular updates, and delivery on agreed timelines.

Web Developer (Freelance) — Weblancer.net — Nov 2021 – Apr 2022

- Built and updated client websites from design mockups, integrated REST APIs, and handled hosting and deployment.
